

Prod&Pack Planner Taiprora Web platform

Web platform for the digitalization of planning processes, created by Taiprora for a customer operating in the Food & Beverage sector.

• Customer needs

The needs was to digitize the production and packaging plan, which the customer managed through Microsoft Excel sheets without any traceability.

The greatest challenge was to manage these activities in **2 different plants**, each one with **11 production lines and 11 packaging lines**.

• Our Project

Through the "Taiprora Prod&Pack Planner Web Platform", the Customer can generate and review the weekly production and packaging plan of all their production plants.

Some key features of this web platform:

- Production and packaging plan progress management;
- Interfacing with the **ERP**;
- Interfacing with the **MES**.

ADVANTAGES OF THIS SOLUTION

- ✓ Immediate WIP (Work in Progress) management
- ✓ Ease to use and reduced compilation times
- ✓ Multi-user plans management
- ✓ Immediate installation. Access via web browser.
